Program Administrator and Web Site			Program Description
Arizona Statewide Overview	<p>Restructuring of the investor-owned utilities in Arizona has been based on regulatory decisions of the Arizona Corporation Commission. In September 1999, in Decision No. 61969, Rule 14-2-1608, the ACC instructed utilities to include an SBC charge in their restructuring plans to fund Commission-approved low-income, DSM, consumer education, renewable energy, etc. programs. Over time, however, SBC funding by Arizona utilities began to focus increasingly on renewables and less on energy efficiency programs. For the investor-owned utilities, the bulk of the SBC funding finances the Environmental Portfolio Standard rather than efficiency programs. Legislation was passed in May 1998 (HB2663) to implement restructuring in the public sector in Arizona (the Salt River Project - SRP - is the second largest supplier in the state). SRP's public benefits funding supports a number of energy efficiency programs.</p>		
Arizona Public Service Company http://www.aps.com/home	Program	Residential On-line Energy Survey	An on-line residential energy survey that gives customers a quick overview of how they use energy and ways to save. The "University" section is a primer on energy facts.

Tucson Electric http://www.tucsonelectric.com/	Program	Guarantee Home	A residential new construction program that guarantees heating and cooling costs and comfort for three years. If the annual cost exceeds the specified cost, the homeowner will receive a refund for 100% of the exceeded costs. Each Guarantee Home receives a reduced electric rate that ranges from 12-22% lower than the standard residential electric rate. Guarantee Homes are constructed to stringent standards to assure health, safety, comfort, durability and affordability and are inspected and tested by TEP. Every Guarantee Home exceeds Energy Star requirements and automatically receives Energy Star certification from DOE.
